Price range: £200 - £10,000

Hard Drive Destruction

CD Destruction

Particle Size: 2.2mm X 4mm

TJX Effect

TJX Companies - the largest international off-price department store chain in the US. UK branch is known as T.J. Maxx, T.K. Maxx and HomeSense

In 2006 45 million customer records (card details) were stolen.

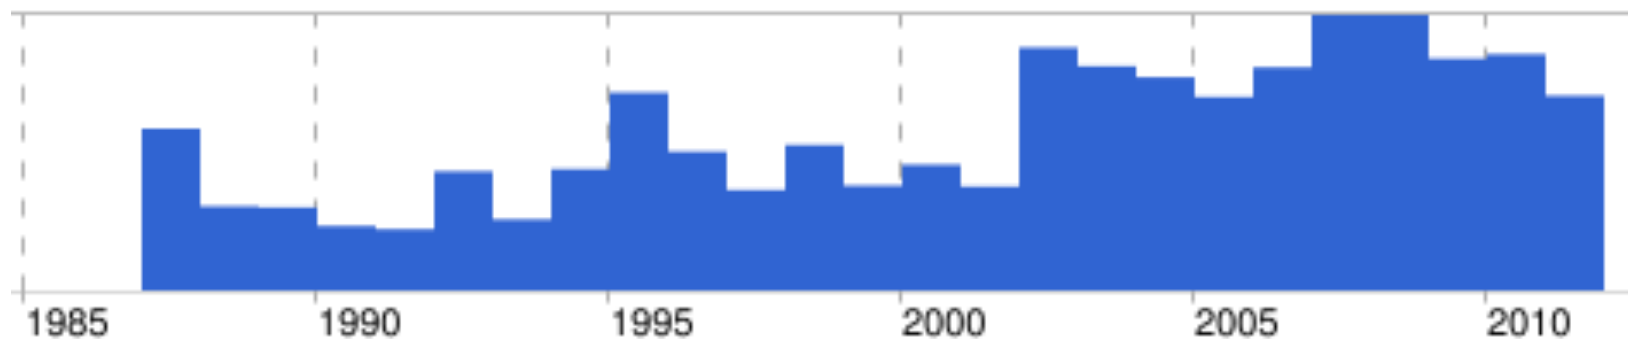

TJX has spent more than \$20 million to sort the problem.

TJX Effect: The data breach, which actually took place over a period of years, has put the entire retail industry on the defensive and stirred up demands for all businesses that handle payment card information to do a better job of protecting it.

TJX Paradox

There's an interesting paradox in the TJX Effect, and it has to do with the company's financial performance. While at least a dozen customers have sued the company for not properly protecting their payment information - many more were still shopping at its stores.

Research Project Calculations on the Cloud

2 months to set the network
Cost: £1,000,000.00

Identity Theft - Bennett Arron

Bennett Arron – a UK comedian and writer. Bennett had his identity stolen and the consequences were devastating. He spent two years trying to clear his name, during which time he became homeless and had to live with family and friends. Bennett now performs a one-man show based on this event in his life. He performed the show, **It Wasn't Me, It Was Bennett Arron** at the InfoSecurity Europe 2011.

Bruce Schneier

Bruce Schneier is an internationally renowned security technologist and author, who was described by *The Economist* as a "security guru".

His books:

Applied Cryptography

Secrets and Lies

Schneier on Security

Two talks at the event:

- 1) CyberWar
- 2) Security, Privacy and The Generation Gap

I hope it was interesting.
